

PRO-COM[®]

MULTI-PURPOSE COMBINATION BODY FOR LIGHT DUTY TRUCKS

- AIR-FLO Manufacturing now delivers the original center conveyor dump body to the light duty chassis series.
- Manufactured of 304 Stainless Steel, the PRO-COM[®] combination body will ensure a long life and low maintenance.

- The PRO-COM[®]'s modern design with uni-body construction eliminates crossmembers. A low mount hoist with flat floor design ensures a lower center of gravity for a safer more stable load.
- The versatility of the PRO-COM[®] allows for quick and efficient maintenance operations without the labor and time involved with traditional equipment. A single unit can be used for: a dump body, spreading ice control material, cold or hot mix patching, mulch and top soil work. The uses of the PRO-COM[®] are virtually endless.

New Clean Design Eliminates Crossmembers.

Body Length	Side Height	Tailgate Height	Struck Capacity
9"	17"	23"	3.3 Cubic Yards
11"	17"	23"	4.0 Cubic Yards
